

BENDING UNIT BUC-60/80/100

ADVANTAGE:

Cardanic bearing in both axis of the mirror surface, NO SHIFT OF BEAM AXIS DURING ALIGNING

Swivel axis and tilting axis adjustable separately

Clear aperture 60mm up to 100mm

Precision levelling for 90°-bendings adjusts with zero backlash

Direct water-cooled optics for highest laser power

Compact construction, possibility of attachment on 4 faces

No re-alignment after change of optics

Identical optics in components of identical aperture too use

Large range of focal-lengths and special optics

Safety switches, optional

Cross-hair insert for control of beam centre

Refreshing of Optics possible

Spares available from shell
